* Programed Requirements

Our programed requirements on STL for assistance was established at 16 man months/month in latter of 58. During our review of the STL proposal for their new contract (for the period 1 Jan 59 to 30 June 1960) this requirement was increased as shown on the schedule to follow. Contract negotiations on this new contract are still in progress.

It is to be noted that by administrative decision

4/Col Bogart determined, contrary to previous practice, that essentially all STL work on WS 117-L would be charged against our Contract funds. These charges do not include housekeeping. Prior to this decision the price paid for boosters for our program included any STL charges except those placed on 117-L. This ruling reduced reduces to a minor degree the man power available for direct application on tasks specified by us.
